

B1RL 14K GOLD PLATING SOLUTION - 1LITRE

SKU: 1739

This cyanide-free plating formula produces beautiful results in a much safer and environmentally-friendly formula. The days of cyanide-based plating are over. Not just safer but a higher quality surface finish. Cyanide-free means higher corrosion resistance over silver or even brass substrates – slower oxidisation!

Unlimited shelf life! Even after months of use, it produces unchanging colour. Perfect for small jobs or repair-work. Does not plate cold – this 14k formula needs to be heated to reach the desired 14k colour.

PRODUCT DESCRIPTION

ADDITIONAL INFORMATION

Weight 1.1 kg

Dimensions $9 \times 9 \times 22 \text{ cm}$

Gold Content 0.7g

Anode Required Stainless Steel (at surface area ratio of 2:1 anodic surface)

Suitable for Rack or Barrel plating

Bath Size 500ml – 100 litres

ph 7.5 – 8.5

Plating Temperature 45-50 degrees C (115 - 125 degrees F)

Rectifier Requirement DC; minimum 10v, minimum 3amps up to 50 amps. Low Ripple

Deposition Speed 0.15 micron in 30 seconds

Thickness up to 1 micron
