

DRM F150RE

SKU: 1032

The DRM F150RE Rolling Mill is a top quality sheet rolling mill with the benefit of side extensions and Durston's unrivalled gearbox. Durston's mills are constructed from cast iron for optimal strength and rigidity with a reassuring weight to support a lifetime of use and giving a better-rolled product.

PRODUCT DESCRIPTION

The DRM F150RE Rolling Mill is a top quality sheet rolling mill with the benefit of side extensions and Durston's unrivalled gearbox. Durston's mills are constructed from cast iron for optimal strength and rigidity with a reassuring weight to support a lifetime of use and giving a better-rolled product. The rolls are specially induction hardened to 64 RC, the main barrel to a depth of 6mm ensuring your rolls last a lifetime. The bearings are self-lubricating and wholly maintenance-free and are specifically designed to produce the best possible rolled finish. The heavy-duty 5-1 gearbox is unrivalled in the industry and makes turning much easier. Behind the cover, you will find two specially formed gears to make rolling even smoother. An extension side roller incorporates four shallow half rounds giving your rolling mill even more versatility. Safety features include a protective guard around the top gears.
