 - **Ergonomically designed** for comfort during extended use.
-

PRODUCT DESCRIPTION

The Durston Microscope is a high-performance optical tool meticulously designed for jewellers, watchmakers, setters, and engravers. It offers remarkable precision and clarity with its high-resolution binocular optics and special multi-coating technology, which regulates light refraction to provide crisp, clear images. The microscope's 45x zoom magnification range allows for close examination of intricate details, and it includes an additional .5 lens for a larger working area up to 15cm.

The variable LED lighting adjusts to your specific needs, ensuring optimal visibility. Ergonomically crafted for comfortable use during extended periods, this microscope is an indispensable tool for professionals. Its robust construction guarantees longevity, making it a reliable addition to any professional's toolkit.
