 - Part of the Durston Professional Range of Pliers & Cutters
-

PRODUCT DESCRIPTION

These Bent Nose Pliers are manufactured with laser precision edges that provide seamless, repeatable bends and curves. The jaw tips are bent perpendicular to the joint, which increases the visibility and reach for some tasks.

These pliers are created with a lap joint, where one half of the joint overlaps the other with a screw set through both halves. This screw allows the joint to be adjusted as required.

The double-leaf spring consists of flat, tempered metal tabs attached to the inside of each of the tool handles, positioned to meet and hold the handles apart (and the jaws open) until they are squeezed closed, delivering a fast, strong rebound for enhanced productivity.

The ergonomic handles provide a comfortable grip, allowing you to work longer and reduce hand fatigue.

Durston Bent Nose Pliers are created with poly handles for increased comfort.

Jaw style : Bent Nose

Jaw length : 23mm

Tip width : 1.2mm

Handle length : 89mm

Overall length/dimensions :115mm
