 - Part of the Durston Professional Range of Pliers & Cutters
-

PRODUCT DESCRIPTION

These Front End Flush Cutters are manufactured with precision edges that provide seamless, repeatable cuts. The cutting blades are perpendicular to the handles, which produces more cutting leverage and closer access to flat surfaces.

These cutters are created with a lap joint, where one half of the joint overlaps the other with a screw set through both halves. This screw allows the joint to be adjusted as required.

The double-leaf spring consists of flat, tempered metal tabs attached to the inside of each of the tool handles, positioned to meet and hold the handles apart (and the jaws open) until they are squeezed closed, delivering a fast, strong rebound for enhanced productivity.

The ergonomic handles provide a comfortable grip, allowing you to work longer and reduce hand fatigue.

Durston Front End Flush Cutters are created with poly handles for increased comfort.

Jaw style : Flush End

Jaw length : 12mm

Handle length : 89mm

Overall length/dimensions : 115mm

Max. cutting capacity : 0.8mm Non Ferrous Metals
