PRODUCT DESCRIPTION

These Razor Flush Tapered Cutters are manufactured with laser precision edges that provide seamless, repeatable cuts. The tapered shape created enhanced access to close work areas and fine details, leaving a minimal pinch. The tapered head protects the tips from damage by cutting at the centre of the jaw.

These cutters are created with a lap joint, where one half of the joint overlaps the other with a screw set through both halves. This screw allows the joint to be adjusted as required.

The double-leaf spring consists of flat, tempered metal tabs attached to the inside of each of the tool handles, positioned to meet and hold the handles apart (and the jaws open) until they are squeezed closed, delivering a fast, strong rebound for enhanced productivity.

The ergonomic handles provide a comfortable grip, allowing you to work longer and reduce hand fatigue.

Durston Razor Flush Tapered Cutters are created with poly handles for increased comfort.

Razor Flush cut offers clean, precise, flat cuts on more used with softer metal wire and smaller delicate cuts

Jaw style : Razor Flush Tapered

Jaw length : 15mm

Handle length : 89mm

Overall length/dimensions : 130mm

Max. cutting capacity : 0.8mm Non Ferrous Metals
