PRODUCT DESCRIPTION

The **Durstons Jewellers Blow Torch with Cyclone Flame**, this refillable Butane powered Blowtorch is suitable for many tasks including soldering and Jewellery Repair, produces a consistent and powerful cyclone flame that can be adjusted giving even greater control.

This versatile torch can be used free-standing or handheld by removing the base, electronic ignition, flexible flame adjustment and safety lock make this Blow Torch easy and safe to use. (please follow safety guidelines when using this item)

Butane Gas sold separately, we recommend <https://amzn.eu/d/geOOQzef> or similar, please see your local supplier, fuel refill port in the base of the Blow Torch

Standard vs Cyclone?

The main differences are the standard torch has a more pointed inner cone for more precise work and the cyclone is a more general engulfing flame for example, annealing larger pieces.
