PRODUCT DESCRIPTION

High Heat Kevlar Gloves, from Durston Tools, are an essential part of your personal protective equipment when working with extreme temperatures. The 14-inch gloves are ideal for welding or casting jobs, combining Kevlar and aluminium foil on the back and cuff. A combination of cotton lining for comfort with Kevlar stitching for safety creates a glove which conforms to EN388/407 standard up to 500 degrees Celsius. The Kevlar High Heat Glove – part of Durston's award-winning range of products, available since 1961.
