

LUCINDA EASY ROLL C130 ROLLING MILL

SKU: 1041

Introducing the Lucinda Easy Roll C130 from Durston Tools, a **Patent Pending**, cutting-edge addition to the world of jewellery making. This revolutionary design rolling mill integrates the trusted qualities of our original DRM series with our amazing new Easy Roll gearbox, a world's first in technology, offering an unmatched combination of speed and ease.

- **Our latest Revolutionary 15-to-1 Gearbox:** The Lucinda Easy Roll C130 is equipped with an innovative 15-to-1 gearbox, striking the perfect balance between rapid operation and effortless handling.
- **Optimised for Efficiency:** Designed to enhance productivity, this rolling mill reduces manual effort while delivering precise results, making it ideal for a variety of metalworking tasks.
- **Versatile Rolling Capabilities:** With 11 Square Wire Rolling Grooves and a 75mm flat rolling area, the Lucinda Easy Roll C130 is adept at handling diverse design requirements.
- **Side Extensions:** The side extensions include 4 Half Round Grooves (4 to 1.5mm).
- **Built to Last:** Durston's signature solid single-cast body and induction-hardened rolls ensure that the Lucinda Easy Roll C130 remains a reliable tool for years to come.
- **Space-Efficient and Adaptable:** Its compact design makes it a suitable addition to any workshop, maximizing space without compromising on functionality.

- **Precision and Quality:** The 60mm diameter rolls, with a total width of 130mm (75mm / 55mm), are engineered for accuracy and quality, catering to both intricate and robust metalworking projects.

PRODUCT DESCRIPTION

Introducing the Lucinda Easy Roll 15-to-1, the newest star in the Durston Rolling Mill family. This innovative rolling mill is a testament to Durston's commitment to combining efficiency, ease of use, and advanced technology.

The Lucinda Easy Roll, available in both the C130 and F130 models, represents a significant advancement in rolling mill technology. Inspired by the user-friendly nature of our 50-to-1 gearbox (Olivia & Molly), the Lucinda Easy Roll features a revolutionary 15-to-1 gearbox. This new design offers the best of both worlds: the simplicity and ease of use like the 50-1 models coupled with a faster rolling capability, making it accessible to a broader range of users.

Drawing on the robust design of the DRM 130 and the Agile's ultra-strong, slimline frame. This combination of strength and elegance is a hallmark of Durston's dedication to quality and innovation. The 15-to-1 gearbox, the centrepiece of this model, is packed with new innovations, setting a new standard in rolling mill technology.

Whether you choose the C130 with its versatile combination rolls or the F130 for exclusively flat rolling, each model is equipped with side extensions featuring half-round grooves, enhancing their functionality and versatility.

The Lucinda Easy Roll really does have it all, speed and ease of use without taking up valuable space in your workshop.
