

PLATINIZED TITANIUM (PT) ANODE SMALL

SKU: 1980

Designed for small-scale plating operations, this Platinized Titanium Anode is suitable for baths ranging from 600ml to 2L.

- **Size Compatibility:** Measures 10cm x 2.5cm, ideal for small baths.
 - **Material:** Made from high-grade titanium, coated with platinum.
 - **Versatility:** Compatible with Rhodium, Platinum, and other acidic plating baths.
 - **Design:** Features a cross-section head for enhanced plating coverage.
 - **Accessories:** Includes a 30cm corrosion-resistant PVC coated 15amp 2-sided clipping cable.
-

PRODUCT DESCRIPTION

This anode is a key component for achieving precise and uniform plating in smaller baths. Its robust construction and thoughtful design ensure a contaminant-free plating environment and comprehensive coverage across all pieces. The included durable clipping cable adds to its reliability and ease of use in professional settings.
